Python for Data Science and AI
Data Analyst Associate
Tableau Foundation Course
Rio 45 Internship
SQL Associate

Honors-Awards

Zuno Fellowship Programming
PrepSet Exam
CodeKaze

Pawan kumar

AI Engineer @Calance | Multiple credentials in AI/ML , Data Science
Alwar, Rajasthan, India

Summary

Data Scientist | Data Analyst | Python Enthusiast

Hey there! I'm Pawan Kumar, and my journey has taught me one thing, it's that you don't need a perfect start to make your dreams come true. Here's a little sneak peek into my rollercoaster ride through the world of tech and data.

Education: Arya College of Engineering & Information Technology

Back Bencher Turned Tech Enthusiast:

I was your typical back bencher in school, and scraping through my 10th board exams was a small victory in itself. I didn't make it to the big league with IIT or any prestigious college, but that's where my story takes an interesting turn.

Cybersecurity Maverick:

At the age of 15, I stumbled upon the world of cybersecurity. Not only did I explore it, but I also opened a hacking channel on YouTube, which surprisingly gained 5,000 subscribers within a year. However, YouTube had different plans, and my channel was banned.

The Journey Continues:

But I didn't stop there. I delved deeper into the realm of cybersecurity, taking courses to enhance my skills. When I entered college, I discovered web development and taught myself full-stack web development. This skill not only earned me some bucks through freelancing but also led me to join a startup where I worked for 7 months as a full-stack web developer, managing a team of five talented individuals.

A Leap into App Development:

As the need for an app arose, I decided to take matters into my own hands. I dedicated 15 days to learn and master full-stack app development, resulting in my very own app being published on the Play Store.

The AI Era:

The real game-changer came when my college assigned me a project involving a humanoid robot. It was an entirely new world for me. I gathered a team of five and dived headfirst into AI. Together, we successfully completed the project, and my interest took a sharp turn towards data science.

From AI to Data Science:

Data science became my passion, and I embarked on a journey to learn and grow in this field. I've had the privilege of working on numerous data science projects, each more fascinating than the last.

If you're as passionate about data science, Machine Learning, data analysis, and Python, Django developer as I am, let's connect and explore the limitless possibilities of this exciting field together. Let's write the next chapter of our stories side by side!

Experience

Calance

AI Engineer

March 2026 - Present (3 months)

Gurugram, Haryana, India

YouTube

Content Creator

August 2024 - Present (1 year 10 months)

I successfully created and managed a YouTube channel that provides valuable insights into Data Science and AI/ML.

- Developed engaging content, including AI/ML project walkthroughs and data analysis tutorials.
- Collaborated with viewers and clients on various freelancing projects in data science.
- Fostered a community focused on practical knowledge and career advancement in technology.

Primesource Consulting LLP

Senior AI Engineer

December 2025 - March 2026 (4 months)

Designing and building production-grade Voice AI systems, including conversational chatbots and AI-powered calling agents

Developed LLM-driven voice chatbots using STT/TTS pipelines for real-time, human-like conversations

Built AI calling agents capable of multi-turn conversations, intent handling, and dynamic response generation

Integrated LLMs with voice infrastructure to support automated inbound and outbound calling workflows

Focused on latency optimization, conversation quality, and system reliability for real-world deployments

Collaborated with backend and product teams to translate requirements into scalable AI solutions

FinSocial Digital systems

AI Engineer

October 2024 - November 2025 (1 year 2 months)

Newark, DE

I played a pivotal role in advancing AI technologies at FinSocial Digital Systems by developing innovative solutions for trading.

- Engineered a multi-agent LLM framework to streamline trading processes with AI.
- Created diverse AI agents, including voice, video, and chat, to enhance user experience.
- Collaborated with teams to integrate AI solutions effectively within trading platforms.

BytEquity

Data Analyst

December 2023 - August 2024 (9 months)

Noida, Uttar Pradesh, India

Automated Trading Strategies:

Developed and deployed 8 automated trading strategies on the Fyers and Kite platforms, increasing trade execution speed and market analysis efficiency by 25%.

Utilized Python, API integrations, and quantitative analysis to create robust trading algorithms that improved decision-making and financial market performance, increasing client returns by 25%.

No-Code Platforms & Automation:

Built a no-code platform enabling users to automate WhatsApp and email marketing, improving client communication and reducing manual efforts.

Developed automated tools for high-net-worth clients (HNIs) to streamline operations and improve user experience without the need for coding expertise.

Leadership & Client Management:

Led a team of developers, managing project workflows and coordinating efforts to meet deadlines and client expectations.

Handled HNI clients, understanding their needs and providing tailored solutions, driving client satisfaction and repeat business.

Quantitative & Data Analysis:

Conducted data analysis for marketing campaigns, gathering insights from web scraping and marketing data to create automated solutions for data-driven decisions.

Worked on AWS and Azure platforms to process, store, and analyze large datasets efficiently, using cloud resources to enhance scalability.

Web Scraping & Data Solutions:

Implemented web scraping techniques to collect real-time market data, which was then used to enhance trading models and automate repetitive tasks. Applied data insights from web scraping to improve client acquisition and retention strategies for the marketing department.

Orga Plants

Python Developer

April 2022 - September 2023 (1 year 6 months)

I had the opportunity to contribute as a Python Developer at Orga Plants, where I focused on improving data handling and user experience.

- Developed web scraping tools to efficiently manage user, product, payment, and order data.
- Collaborated on UI and backend development with Django to enhance overall functionality.
- Optimized code, achieving a notable 30% improvement in page load times.

CareTeam Private Limited

Python developer intern

January 2022 - March 2022 (3 months)

remote

- Developed an online certificate generator platform using Python and Django, enhancing user experience.
- Managed user data, including login, registration, and certificate verification processes.
- Implemented automated coupon code expiration, significantly reducing manual processing time by 70%.

Future ready talent

Microsoft Future ready talent Intern

October 2021 - December 2021 (3 months)

remote

Analyzed and synthesized extensive COVID-19 data from the Corona API, extracting country-specific statistics on recoveries, total cases, deaths, and age demographics and make a visually captivating website dashboard that served as a valuable resource for over 50k users, delivering accurate and timely information on the pandemic.

Haryana

9th Gurugram Police Cyber Security Summer Internship 2021 at Haryana

June 2021 - July 2021 (2 months)

In this internship, I have attended many sessions and also learn many new skills related to Cybersecurity with the best speaker. I have learned the following skills by following speakers.

Web site Hacking, Web site Hacking, Online Human Trafficking, Capture the flag, Social media crime's Cases Studies and Modus Operandi And Safety, Security-Redressal, Email Crime, Mobile Crimes, Financial Frauds by Mr. Rakshit Tandon.

Coming up – A smart and intelligent life by MR Dinesh O Bareja.

Cloud security and Internet of things by Mr. Amit Tiwari.

Think like a hacker / Red teaming by Dr. Oopps.

The white side of Dark Web though forensic intelligence by Mr. Deepak Kumar.

The white side of the Dark Web through forensic intelligence by Mr. Deepak Kumar.

GDPR by Mr. Prashant Mali.

Cyber Crime Investigation and Intelligence Operation by Mr. Harshit Gupta.

Bug bounty by Mr. Anand Prakash.

Cyber Space by Mr. Liad Herman.

Relevance of Mobile Safety Application and How to be an entrepreneur in the Cyber Space by Mr. Aditya Narang.

Threat Intelligence by Mr. Deep Shankar Yadav.

Building and Operationalizing SOC by Mr. Deep Shankar Yadav.

CryptoCurrency Investigations by Mr. Anupam Tiwari.

Cyber Crime Case Studies by Mr. Shudhir Inspector/ SHO Gurugram .

Remote Access to Computer Using WhatsApp (Python) by Mr. Mahesh Rakheja.

Digital Forensics Tools, Technologies, and Career options by Mr. Sashi Dhar.

Psychological Implications of Social Media Crimes by Mr. Nirali Bhatia.

Cyber Forensics by Mr. Santosh Khadsare.

Ransomware- KPMG Network Forensics by Mr. Jagvinder S Brar.

Cyberlaw and IT Rules by Mr. Pawan Duggal.

The evolving cyber-attacks and threats by Safe House.

Cueweb.in

Website Frontend Developer

November 2020 - January 2021 (3 months)

india

Worked as a front-end developer and learn new skills and gained experience.

Education

Lovely Professional University (LPU)

Master of Business Administration - MBA, Dual Specialization (Data Science & Finance) · (March 2026 - March 2028)

Arya College of Engineering and IT

Bachelor of Technology - BTech, Electronics and Communications Engineering · (2019 - 2023)

Jain Senior Secondary School

Secondary Education , Science & Math · (July 2017 - April 2019)

Sandeepan senior secondary school

secondary education · (July 2011 - March 2017)
